Project Name	Chat Application
Maximum marks	4 marks

#### Data Flow Diagrams:

A Data Flow Diagram (DFD) is a traditional visual representation of the information flows within a system. A neat and clear DFD can depict the right amount of the system requirement graphically. It shows how data enters and leaves the system, what changes the information, and where data is stored.

User type	Functional requirement	User story number	User story/ task	Acceptance Criteria	Priority	Release
Users	Data collection	USN-1	Collect the feedback from the general users	-	High	Sprint 1
	Model Design and development	USN-2	With the help of feedback develop a user-friendly application	We could check the scalability	High	Sprint 2
	Testing	USN-3	Test the limits of the application	We could deploy the application	Medium	Sprint 3
